INFO: today's statistics

The third wave of coronavirus in Poland is not weakening, it is even increasing. Yesterday there were 32,874 new positive tests, today - 35,251. At the same time, our office receives information about irresponsible behavior of students in the dormitories.

Today we are starting the Easter holiday, but remember - we are in Silesia, a region that is currently the leader in the number of new infections in Poland.

Therefore, wishing you a healthy, cheerful, peaceful Easter break, we appeal and remind you: **distance, disinfection, masks, airing** and - **logic, common sense, caring for yourself and other people around you.**

We sincerely hope that it will be possible to change the current epidemic trend in Poland, which we wish you and ourselves. But a lot depends on all of us in the coming days. Keep distance, limited contacts (selfisolation - if necessary), stay safe.

Polish authorities recommend limiting travels and trips to the absolute minimum. Nobody can assure you that no further restrictions will be introduced soon. The restrictions apply and, what's more, they are also introduced in neighboring countries. We are not able to guarantee the possibility of return for students who decide to leave, the situation is changing dynamically. We count on your understanding and common sense.
